THE SEASON!**

HELPFUL TIPS & ADVICE FOR MULCHING

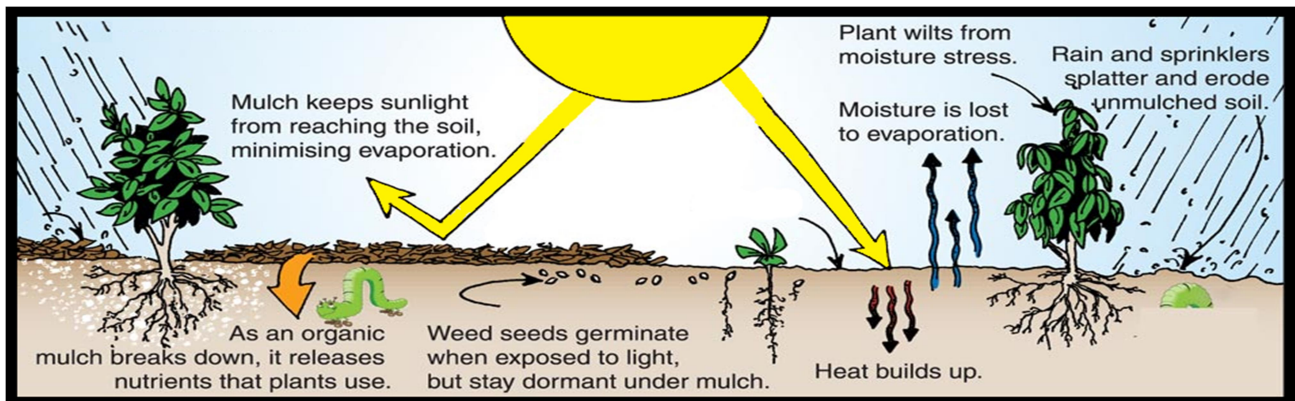

SPRING:

AFTER THE GROUND HAS THAWED, APPLY THE MULCH 2 - 3 INCHES THICK.

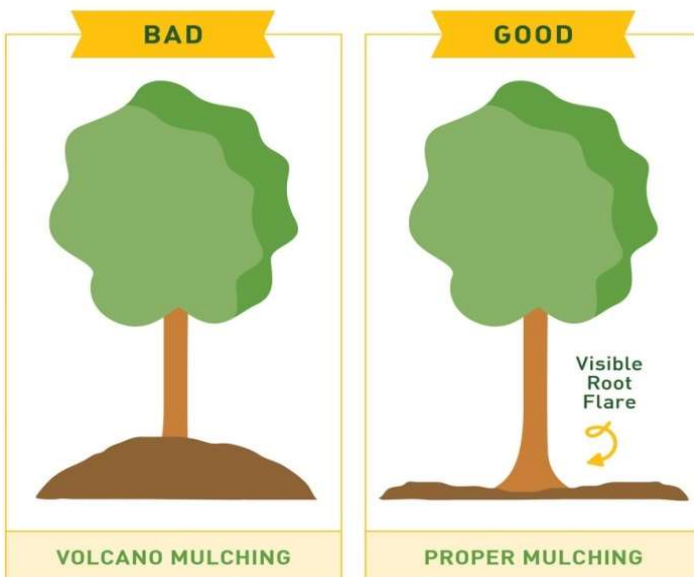

FALL:

A SECOND MULCH APPLICATION WILL FURTHER INSULATE AND PROTECT PLANTS THROUGH THE WINTER.

WHY IS MULCH IMPORTANT?

MULCHING AROUND YOUR TREE

DID YOU KNOW...

MOLD CAN GROW ON MULCH IN CERTAIN CONDITIONS? **DON'T WORRY! EVEN THOUGH IT ISN'T PRETTY TO LOOK AT, THE MOLD IS SAFE FOR YOUR PLANTS, EASY TO PREVENT, AND EASY TO REMOVE. MOLD BLOOMS THRIVE ON MOISTURE. TO PREVENT MOLD BLOOMS, FLUFF THE MULCH MONTHLY (OR MORE DURING PERIODS OF HIGH PRECIPITATION) TO DISRUPT THE BLOOMING PROCESS. THIS WILL ENCOURAGE AIR FLOW AND KEEP THE MULCH FROM MATTING TOGETHER. TO REMOVE THE MOLD, USE A RAKE OR GLOVES AND DISPOSE OF THE MULCH AWAY FROM YOUR YARD.**
